

INQUISIT

BY MILLISECOND SOFTWARE™

Two-Day Methods Workshop in Political Psychology:

Measuring Social-Cognitive Processes Online and in the Lab

This two-day, hands-on workshop provides graduate students and faculty in political science, psychology, and related disciplines interested in measuring social-cognitive processes the tools needed to design and launch their own experiments using "Inquisit," a platform tailored toward psychological testing online and in the lab. Over two days, participants will learn how to utilize well-known social-cognitive tasks (e.g., I.A.T.) and adapt these tools for their own purposes. Participants will learn how to integrate psychological measurement into online surveys using Qualtrics.

Dates: September 7th & 8th, 9am – 4:30pm

Location: 3465 Rue Peel, Room 102. McGill University, Montréal, H3A1W7

Sample Outline: Online experiments & Inquisit • Social-Cognitive Measurement • Dealing with data • Accessing & adapting tasks • Survey experiments using Qualtrics.

Free to attend. Registration required.

Jointly Sponsored by the Centre for the Study of Democratic Citizenship (CSDC) and the Chaire de Recherche en Psychologie Politique de la Solidarité Sociale (CPPSS)
